CASE STUDY

Assess & Benchmark - Mid Cap engineering firm

CONTEXT

A mid-cap engineering firm operating in three jurisdictions had no formal ethics & compliance function. The board sought a pragmatic, auditable program to reduce procurement and bribery risk within a constrained timeline and budget.

ACEG APPROACH — APPLIED

1. ASSESS & DISCOVER — We Listen & Understand. We conducted targeted discovery sessions with senior leadership and procurement, reviewed key contracts and controls, and identified the most material compliance gaps that threatened deal flow and audit readiness.

2. DESIGN & CUSTOMIZE — We Strategize & Design. Using the discovery insights, we drafted a right-sized E&C framework, prioritized controls for immediate impact, and created a clear implementation roadmap aligned to business cycles.

3. IMPLEMENT & EMPOWER — We Implement & Collaborate. ACEG worked side-by-side with the internal advisory team: delivering short leader workshops, rolling out core policy changes, and coaching operational owners through the first 90-day actions.

ACTIVATE COMPLIANCE - SIMPLIFY RISK - ELEVATE INTEGRITY

Assess & Benchmark - Mid Cap engineering firm

4. SUSTAIN & OPTIMIZE — We Measure & Optimize. We established a simple metrics dashboard and communications cadence to track adoption and refine the program based on feedback and analytics.

OUTCOME

Board-aligned E&C program delivered and operationalized; internal owners report clearer accountability and faster, auditable compliance decisions.

CLIENT QUOTE

“ACEG translated intention into an operating program we could use immediately.” — Chief Ethics and Compliance Officer
